The image shows a screenshot of a code editor interface with a dark theme. At the top, there are three tabs: 'module.py' (active), 'addresses.rb', and 'sentiments.ts'. The 'module.py' tab contains the following Python code:

```
1 import datetime
2
3 def parse_expenses (expenses_string):
4     """Parse the list of expenses and return the list of triples (date, amount
5     Ignore lines starting with #.
6     Parse the date using datetime.
7     Example expenses_string:
8         2023-01-02 -34.01 USD
9         2023-01-03 2.59 DKK
10        2023-01-03 -2.72 EUR
11    """
12    expenses = []
13
14    for line in expenses_string.splitlines():
15        if line.startswith("#"):
16            continue
17        date, value, currency = line.split(" ")
18        expenses.append((datetime.datetime.strptime (date, "%Y-%m-%d"),
19                        float (value),
20                        currency))
21    return expenses
22
23 expenses_data = '''2023-01-02 -34.01 USD
24                 2023-01-03 2.59 DKK
25                 2023-01-03 -2.72 EUR'''
26
```

On the left side of the editor, there is a vertical toolbar with icons for file explorer, search, source control, and other development tools. At the bottom left, there is a status bar showing 'main' and some commit statistics.
